EXECUTIVE SUMMARY

The ask, and our answer

THE ASK

Materially reduce IT spend in 2026 — without disruption.

Kroger asked Experis to find significant, near-term cost savings across IT resourcing and services, while protecting delivery, active projects, and the contract workforce.

- Lower the cost of the current run rate
- Protect delivery continuity & talent
- Move quickly, with minimal program risk

OUR ANSWER

A four-lever value acceleration plan.

Stacked savings — bill rate, holiday furlough, AI & automation, and vendor streamlining — executed with our proven transition framework to keep delivery steady.

Up to ~\$11M+

- 10% bill rate adjustment + furlough
- \$1M target from AI & automation
- \$1–7M from vendor streamlining
- Modernized rate card for steady-state savings

A woman with blonde hair, wearing a bright yellow button-down shirt and grey jeans, holds a black tablet. She is smiling and looking down at the device. A man with dark skin, wearing glasses and a dark green button-down shirt, stands next to her, pointing his right index finger at the tablet's screen. He is looking intently at the device. The background is a plain, light-colored wall.

The diagram illustrates a four-stage process flow. Each stage is represented by a rounded rectangle containing an icon, a title, and a value. The stages are: 1. Cost Efficiency (10% Bill Rate Reduction) with a download icon; 2. Vendor Streamlining (\$1-7M) with a funnel icon; 3. AI & Automation (\$1M target) with a star and plus icon; and 4. Modernized rate card (Rate Card) with a refresh icon. The rectangles are connected by arrows, indicating a sequential process.

Annualized savings scale linearly — about **\$23.1K for every consultant** transitioned to Experis.

*Estimated annualized savings; assumes \$95/hr average bill rate and 20% mark-up. Savings scale linearly with consultants transitioned.
